German Gym

KKDC UK were commissioned to illuminate the window reveals on the building of the German Gym Restaurant.

The lighting designer for the German gym project was Hoare Lea Bristol who worked closely with KKDC UK to achieve the desired effect.

Hoare Lea specified our SIL using a 2800K temperature LED, installed on the base of the window recess, the product creates a stunning affect.

SIL is a low profile, surface mounting, luminaire designed for exterior illumination of window reveals and close offset wall washing.

It utilises a Cree LED with unique 23° x 124° radial spread lens in a range of white colour temperatures.

Originally designed as the first purpose-built gym in England, this Grade II-listed building is conveniently situated in the heart of vibrant King's Cross.
