

Subject: MoMo-L Product Launch
Ref: IM-0173
Category: Product Launch
Date: 17/01/2017

Dear All,

We are now launching the new housing MoMo-L.

The MoMo-L has been developed to allow a greater combination of internal accessories and the new Cluster LED Strip over the current MoMo housing.

Updates (MoMo vs MoMo-L)

- The only external difference of the new MoMo-L product is the taller product format. The new housing is 30mm tall compared to MoMo at 26.5mm. Please see diagram below:

Accessory combination options

- Silver anodised + Diffused cover
- Silver anodised + Clear cover
- Silver anodised + Clear cover + KK508 Louvre

- Silver anodised + KKLN-01 Lens + Clear cover
- Silver anodised + KKLN-01 Lens + Clear cover + Micro louvre

- Silver anodised + Clear cover + Micro louvre

LED strip options

- 352 e/s
- 504 e/s
- 508 e/s
- 207
- 208
- RGB
- **Cluster***

MoMo-L Cluster

- MoMo-L Cluster LED Strip installation guides are still being completed. The current MoMo-L ordering codes do not include MoMo-L Cluster as an option. For more information on MoMo-L + Cluster combination please contact your local KKDC Branch.

MoMo-L + Cluster LED strip allows dynamic control along the length of the product. Meaning that wave/follow me effects are now possible. The Cluster LED strip is based on the same technologies used in Cluster Pixel products.

The control increment for MoMo-L Cluster will be 100mm.

MoMo-L Mounting Options

MoMo-L is being released with all the same mounting options as MoMo. A new lock clip has been tooled to allow for the taller housing.

Please note that the MoMo-L lock clip is currently in production and will be available by end of January 2017.

Pricing

Please contact your local KKDC representative for pricing information.

Availability

MoMo-L range is now fully available.

Kind Regards,
KKDC Design House
