New LiNi-S Glow

The new LiNi-S Glow aluminium housing (14 x 13mm) enables fully homogenous lighting on the diffused cover for new k-line 209 LEDmix 'tuneable white' LED strip, in a low profile and compact form.

The innovative 'glowing' end cap design with dual cable exit, means LiNi-S Glow 209 can be positioned end to end to minimize shadowing. Suitable for interior linear lighting installations and easily attached via 3M tape or clips.
